> Asalamoalaikum Brother Majid, I find your selected articles (see below link) very interesting and this one in particular caught my eye as I work in the Planning field.

I have come across this individual previously and he has indeed been successful at stopping some Mosques getting planning permission. It is a shame that Muslims in this Country are not organised enough to have a online resource / contact to support those involved in building new Mosques or a website that non-Muslims can visit to clear many of the misconceptions that this group alleges when a Mosque is proposed in their area.

I was going to suggest that you email around my details to your contact list - if anyone finds themselves in a problem with planning permission, then to get in touch for free advice from a Chartered Planner. It might help someone out there!

Walaikum Salam

Farooq
