Important Notes Regarding Prayer Time Table

Dear all, Assalamu Alaikum WW,

There are several ways timetables can be constructed based on the mushahadah of Hizbul Ulama UK. There are two charts available one for Isha time and one for Fajar.

Method 1 is to construct your own timetable by manually working out the times for each day using the time length gaps shown in the charts. This can be painstaking and long so

Method 2 is to use a ready calculator which will automatically generate Fajar and Isha times when you input the times of sunrise and sunset for your city or town. This is available on request from Hizbul Ulama.

Method 3 is to use the prayer times directory in our **Salat Times and Quibalah Guide** Book in our website `s Prayer Times / English books , if it contains times for your city/town.

Method 4 is to request prayer times from Dr Khalid Shauket from **moonsighting.com**. However, when you do **so you must state very clearly** to Dr Sahib that you would like the timetable to be constructed **based on the mushahadah chart of Hizbul Ulama UK**. This is because Dr K.Shauket has refined his model from our Mushahadat after some years to observations carried out from various parts of the world and he will send you times based on that new model unless you specifically request timetables based on Hizbul Ulama UK timetable chart.

Wassalam,

Molvi Yakub Miftahi (HGS)
